END GRAIN CUTTING BOARDS

WOODCRAFT LLC offers end grain cutting boards.

Product advantages:

- In end grain cutting boards wood fibers are arranged not parallel, but perpendicular to the cutting surface. That is why, knives remain sharp longer, and the board retains its original appearance.
- While cutting or chopping, the top layer of the board does not undergo structural changes, fully maintaining perfect smoothness.
- End grain cutting boards are less susceptible to infection by bacteria, since the fibers “close up” after cutting. In addition, oiling protects the board against the penetration of bacteria into the fibers.
- It is an excellent piece of décor and a gift.

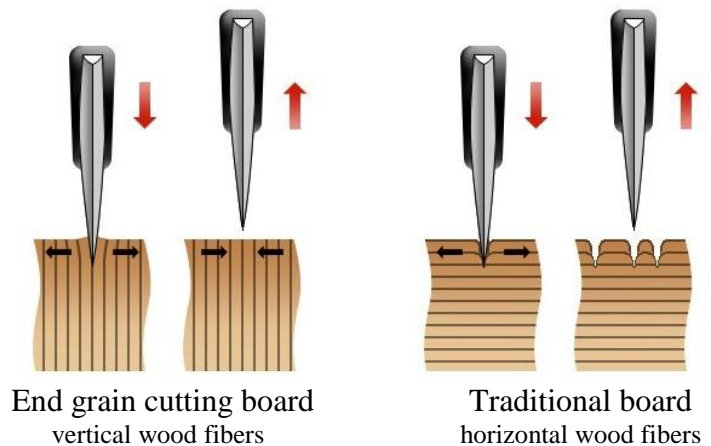

We use oak, alder, birch, elm, walnut ash-tree, aspen, wenge. and natural oil.

Our sizes:

- S - 28x20x2 cm
- M - 40x28x3 cm
- L - 48x32x3 cm
- XL - 60x40x4 cm

We are looking for a dealer in your country.
Please find the photos attached.

Best regards,
Alex Hamen
